Docket No.: 0505-1273P Page 2 of 5

AMENDMENTS TO THE CLAIMS

1-13. (Cancelled)

14. (Previously Presented) A lamp apparatus for a vehicle wherein a light emitting

diode is used as a light source comprising:

voltage adjustment means for adjusting a voltage to be applied to said light emitting

diode; and

, *5* 

a lamp body case formed of a heat radiating member, said voltage adjustment means

being attached to said heat radiating member and said light emitting diode being attached to said

heat radiating member in a spaced relationship from said voltage adjustment means,

wherein the lamp body case includes a bottom wall and a circumferential wall so as to

form a tubular-shaped lamp body case having an opening on a side opposite to the bottom wall,

and includes a high heat radiating cover covering the opening, and

wherein the bottom wall has a greater thickness relative to the circumferential wall of the

lamp apparatus such that the light emitting diode is attached to said heat radiating member in the

spaced relationship from the voltage adjustment means by a distance corresponding to the

thickness of the bottom wall.

15. (Previously Presented) The lamp apparatus for a vehicle according to claim 14,

wherein the voltage adjustment means is positioned on the bottom wall disposed directly

adjacent to the light emitting diode.

Reply to Office Action of April 19, 2007

(Cancelled). 16.

17. (Previously Presented) The lamp apparatus for a vehicle according to claim 14,

and further including a resistance circuit wherein the resistance circuit is positioned on the

circumferential wall of the lamp apparatus.

18. (Original) The lamp apparatus for a vehicle according to claim 17, and further

including an electric circuit, said electric circuit being spaced apart from the resistance circuit

with a partition wall being disposed therebetween.

19. (Previously Presented) The lamp apparatus for a vehicle according to claim 14,

and further including a resistance circuit attached to an inner side of the cover.
